

## **TAG and SABRE**

**TAG** furiously working on some gadget. He's frustrated. **SABRE** enters.

**SABRE**

Hey, whatcha working on?

**TAG**

Laser light scope with GPS infra-red hitch and rotating coil.

**SABRE**

Sounds interesting.

**TAG**

Can't get the coil to spring correctly and the GPS is not giving me an accurate reading.

**SABRE**

The problem is with the numerating chip. It's clearly taking on too much power. Did you trying converting it to a 280?

**TAG**

*(as if he knew this)*

Well, Yeah but... Hmmm. that DOES work.
